General advice

- In addition to covering the content outline in the advance information, students and teachers should consider how to:
 - manage their revision of parts of the specification which may be assessed in areas not covered by the advance information
 - manage their revision of other parts of the specification which may provide knowledge that helps with understanding the areas being tested in 2022.
- For specifications with synoptic questions and topics not explicitly given in the advance information may appear, e.g. where students are asked to bring together knowledge, skills and understanding from across the specification.
- For specifications with optional papers/topics/content, students should only refer to the advance information for their intended option.
- For specifications with NEA, advance information does not cover any NEA components.

Advance Information

Subject specific section

- The information is presented in specification order and not in question order.
- For each paper, the information below gives specific information about areas of the specification that will be the focus of the assessments.
- Any content listed may appear in the examination papers, in any of the standard question styles.
- Topics not included on the list below may still appear in questions with a low tariff, or via synoptic questions.
- Wherever possible advance information linked to the specific marks on 'Research methods' has been avoided, therefore candidates should be prepared to be assessed on **any part** of the **Research methods** topic.
